

Arvinyl Laminates Live Demonstration at 2019 Western Roofing Expo (WRE)

June 04, 2019 04:42 PM Eastern Daylight Time

CORONA, Calif.--(BUSINESS WIRE)--Arvinyl Laminates, the leading provider of TPO and PVC clad metal sheets, will feature a live demonstration of its TPO product capabilities, at the 2019 Western Roofing Expo (WRE) on June 10-11 in Las Vegas. The company will partner with Hapco Inc. to showcase the weldability of Arvinyl TPO laminated sheets, and the performance of BAK welding technology.

At WRE, Arvinyl will illustrate its TPO roofing laminates compatibility with commercial TPO products.

"The number one question we receive at trade shows is, 'Is your product weldable to TPO manufacturers' products?' We are here to tell you, yes. Yes, our product is weldable, and you can see it for yourself," said Andy Paskin, Arvinyl Laminates CEO. "The WRE is our opportunity to illustrate the added value and return on investment we offer to our roofing fabrication and distribution customers."

About Arvinyl Laminates

For more than 60 years, Arvinyl Laminates has been a manufacturer of custom laminated products. As one of the original laminators of PVC and TPO single-ply roofing membrane, Arvinyl's lamination expertise enables it to manufacture quality material with an unmatched superior bond.
