Decorative and Functional

Arvinyl provides the most decorative, low-maintenance and cost-effective surface and substrate materials available on the market, while developing new product solutions that minimize impact on the environment.

Technologically Advanced Processes

Arvinyl has perfected a revolutionary laminating sheet process incorporating advanced, eco-friendly, adhesive technology.

Arvinyl meets your most challenging fabrication requirements, including shearing, forming, cutting, punching and more. We produce sheets, boards and moldings on an extensive variety of substrates, each providing remarkable advantages:

- Insulations from external elements
- Sound damping
- Strength and durability
- EMI and RFI shielding

THE ARVINYL ADVANTAGE

Superior Quality

Arvinyl's internal quality system is driven by our strict adherence to ISO 9001:2015 standards throughout the entire manufacturing process, including 100% sheet inspection. We perform detailed inspections and tests on all materials to ensure project specifications are met at every stage of production.

Industry Expertise

- Roofing
 - Transportation
 - Healthcare
- Marine
 - Retail
 - Architecture

Marine

Arvinyl provides quality solutions to your exacting standards such as in the marine industry. Our marine-type laminates are in accordance with US Coast Guard Specification 46 CFR Subpart 164.012 Entitled Interior Finishes for Merchant Vessels. These laminates are also in accordance with Underwriters Laboratories, Inc IMO A.653(16) and ISO 5659, and ISO 5659 and Annex. Arvinyl marine products meet rigorous industry standards.

Trust Arvinyl's Proven Performance

Advanced technology, competitive pricing and superb material selections are just part of the Arvinyl Advantage. Our company has earned a sterling reputation for value-added, professional customer engagement which results in engineering products that meet customers' vision and exact specification, completed on schedule.
